

URL Shortner

Manoj Kumar

Data Science Intern - Feb 2023

Innomatics Reasearch Labs

Overview

1TAP AI is an URL shortner mainly used for the purpose of shortening the link compared to the previous or original link. We'll shorten our link in a very fastest way. A long link is not a pretty one ,but in short manner it will look like a eye-catching one.This is the main reason we'll create this 1TAP AI to convert the long link into a short link.

Goals

1. To short the original long url into a smaller one.

Requirements

- Python
- Flask
- Flask SQLAlchemy
- Flask Migrate
- SQLite
- HTML
- CSS
- Code editor - VS Code
